**HARD WORK BEATS
TALENT WHEN TALENT
DOESN'T WORK HARD**

-TIM NOTKE

Message from **The Chairman**

This is my great pleasure and privilege as the Chairman of Greenland Group to say a few words about Greenland Training Centre Limited. We all know the need for skilled manpower cannot be over emphasized. With technological advancement, the need has been increasing day by day. To fill the gap of skilled manpower sourcing, Greenland Group is running a fully equipped and well established training centre from 2004.

Bangladeshi workers are in high demand all over the world for their work ethics and productivity. But painfully they are earning less than others for lack of skill. Our country is getting less foreign remittance comparing to our neighbours due to this reason. That is why the present government has given emphasis for skill development for better employment opportunity with higher wages.

It can be mentioned here that short technical training blended with right orientation and self-presentation can do a magic. The workers can earn high remuneration at the workplace. This training and the practical knowledge will be a great wealth of their life. Even after finishing their assignment abroad, they can apply their knowledge in the country.

Greenland Training Centre Limited caters to the gap that exists between the need of the market and the current situation. GTCL is harnessing a win-win arrangement for all the parties involved-employees, employers and the countries concerned.

GTCL is one of the forerunners in Bangladesh with a vision to make a difference in the life of people. GTCL envisions Bangladeshis are equally compensated for their hard work abroad, gain more experience, and can thus contribute to the nation's economy.

Mohammad Abdul Hye
Chairman
Greenland Group

Board of Directors

Mohammad Abdul Hye

Chairman

- Designated Commercially Important Person (CIP) by the government of Bangladesh.
- Heading various business disciplines with strong leadership and expertise.
- Having business operations in more than 10 countries around the world.
- Over 42 (Forty Two) years of overseas experience in Human Resources Development and Placement.
- Always tries to diversify for the betterment of the people through business channel.
- High end education in mathematics from the University of Dhaka.

Abdullah Al-Mamun

Managing Director

- Master in Business Economics & Computer Science Engineering.
- Work Experience in Managerial Level in the United States.
- Industry Experience in information Technology.
- 15+ Years of experience in Human Resource Development and Placement.
- Strong Teaching background in Business Management courses.

MISSION

Greenland Training Center Limited (GTCL) was set up with a mission of turning unskilled hands into skilled and more productive work force thus benefitting the employees, employers and countries concerned.

Professional skill development of a prospective worker is the main objective of the training centre. Professional development refers to vocational education and training with specific reference to specific skills of the person in the area of employment. It may also provide opportunities for other career paths. Vocational education has been related to specific skills, usually tied with immediacy of getting or retaining or raising the status of employment. The objectives of the courses are to develop task skills in such a way that the future-prospects can achieve effective skills thus ultimately achieve leadership skills.

As tapping and placement of human resources is one of the major activities of Greenland Group, GTCL plays the pivotal role in developing the people in such a way that s/he gets the right orientation of the kind of jobs s/he would be required to perform at home and abroad. GTCL puts special emphasis on the practical aspects while basic theories, soft skills, and generic subjects-as the backbone of the entire learning process.

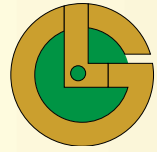

VISION

To be able to
make a meaningful
contribution to the overall
growth of Bangladesh through
providing technology-aided
modern life- skills to the people
of Bangladesh who can bring in
positive changes in their own
lives while contributing to
the economic and imagery
enhancement of the
country

Greenland Group: An Overview

It all started 35+ years ago as a small recruiting agency. Bridging between the overseas employers and local work force who intend to work abroad was the one and only business of the agency at that time. Keeping pace with the ever-changing need of the market, Greenland kept evolving and widening its horizon and turned into a well-crafted business group. Most of the other associate concerns are aimed at providing support to the core business. The concerns of the Group are:

- ◆ **Greenland Overseas**
- ◆ **Greenland Builders Ltd.**
- ◆ **Greenland Training Centre Ltd.**
- ◆ **Greenland Polytechnic Institute**
- ◆ **Greenland Technical Institute**
- ◆ **Greenland Overseas Tourism Ltd.**
- ◆ **Greenland Medical Centre Ltd.**
- ◆ **Greenland Trading & Contracting**
- ◆ **Greenland Manpower Recruitment**
- ◆ **Greenland Services Ltd. (Herfy BD- Food Services)**
- ◆ **Greenland Facilities Management**

Following are few of the attributes that position GTCL at the top:

- A leading organization in terms of providing technical training and placement in the global market
- A long and undented track record of 16+ years
- Faculties with appropriate skills
- Full medical care and check up for all students in association with Greenland Medical Centre
- Extensive support in overseas employment in association with Greenland Overseas
- Govt, non-govt, foreign funded courses are also conducted.
- Comprehensive hands-on training aided by modern equipment
- Extensive computer lab
- Comfortable accommodation for residential students and transport facilities for non-residential students
- Primary healthcare facilities within the premise provided by certified medical professionals
- Weekly management meeting to monitor progress and to troubleshoot issues
- Travelling in association with Greenland Overseas Tourism
- Free monthly application newsletter
- 24/7 security provided by trained security personnel
- Communicative English language and soft skills training compulsory for trainees of all trades.

Operations

GTCL and also Greenland Group as a whole always consider human resources to be the prime resource of the country. Greenland Group has developed a modern technology-aided training centre on its own premises to cater to the need of its local and offshore partners. The training modules have been developed keeping in mind the need of the foreign employers as well as local industries' requirements. However, these skills become handy even if a trainee is recruited in a modern local company.

For job placement both local and overseas employment, GTCL has established a job placement cell for different projects like SEIP-PKSF, SEIP-BACI, SEIP-REHAB, SUDOKKHO etc. as well as for local and overseas employment.

Candidates seeking overseas employment face problems with jobs, professional environment, language, culture, norms, gestures, postures and many other things. Considering these, GTCL offers training and induction courses that not only help overseas employment seekers but also reduces substantial load from the would-be employers' shoulders.

GTCL is simultaneously assisting Greenland Overseas (a business unit of Greenland Group), in training recruits and taking job test according to the needs of the clients. GTCL prepares all recruits at all levels from entry to top management position according to the employer's environment and skill requirement of the organization.

Courses

GTCL offers a wide variety of vocational trade courses from entry level to advanced technical training. The range includes:

- Civil
- Mechanical
- Welding
- Denting & Painting
- Electrical
- Electronics
- Driving
- Auto Mechanic
- Scaffolding
- Interpersonal Development
- Hospitality Management
- Security
- Computer
- Cleaning & Houskeeping
- Japanese Language

GTCL staffs are keen about extracting the best potentials of the students so that the training becomes an effective means to their success. Special emphasis is given on a hands-on approach to teaching by using the modern and technology-aided teaching facilities. GTCL covers all the topics recommended by the Bangladesh Technical Education Board and complies with its guidelines. GTCL also adds topics from the real- world field experience to be important and relevant to the students. GTCL students receive not only the training manuals that can be used as a ready reckoner, but they also get extremely useful technical publications and free tutorials.

Last couple of years GTCL has been working with the government and foreign funded projects like SEIP-PKSF, SEIP-BACI, SUDOKKHO, BRAC, RMMRU etc.

Details of the trade courses:

CIVIL:

- Mason (Plaster, Block)
- Mason (Tiles)
- Rod Binding (Steel Fixing)
- Shuttering Carpentry
- Plumbing (Pipe Fitting Sanitary Work)
- Aluminium Fabrication
- Gypsum Ceiling
- Building Painting
- Scaffolding
- Finishing Carpentry

ELECTRICAL:

- General Electrician (House Wiring)
- Electrical Line Maintenance (Industrial)
- Electrical Industrial & Maintenance
- AC & Refrigeration
- Duct man
- Ducting Insulation Fabrication
- Motor Winding

DRIVING:

- Light Driving
- Heavy Driving
- Traffic Knowledge

DENTING & PAINTING:

- Sand Blasting
- Building Painting
- Industrial Painting

MECHANICAL:

- Automobile (Diesel & Petrol)
- Auto Electrician
- Machinist (Turner)
- Pipe Fabrication
- Industrial Pipe Fitting
- Steel Fabrication

JAPANESE LANGUAGE COURSE

- Level N-5
- Level N-4

COMPUTER:

- Computer Application Program with Internet
- Computer hardware and software
- Computer Application and Graphics Design
- Auto cad 2D & 3D
- Computer Programming & webpage design
- Computer Hardware and Networking

FOOD & BEVERAGE HOSPITALITY:

- Western, Italian, Chinese food production (Cooking and preservation)
- Food & Beverage Service (Waiter, Bartender)
- Front office Management (receptionist Call Operator)
- Cleaning Method
- Waiter

BASIC LANGUAGE :

- English / Arabic / Hindi / Urdu

WELDING:

- Normal Welding (Arc & Gas)
- Welding 1G to 4G
- Welding 6G
- Welding TIG
- Welding MIG
- Welding Gas

SECURITY:

- Residential/Private Security
- Office/Bank Security
- Store keeper
- Industrial security

CLEANING & HOUSEKEEPING:

- Office Boy/ Messenger
- Cleaner (Hospital, School, Mosque, Office etc.)
- Housekeeper
- House Maids
- Nanny / Midwife

Training Summary of GTCL

CIVIL DEPARTMENT

Greenland Training Centre is running twelve courses under Civil Department. More than 13,650 civil discipline technicians have been graduated since we started our operation. Our instructors include CBT qualified experienced Civil Engineers. Most of them are BTEB registered assessors & trainers and they coordinate the overall operation and practical activities. Our students are learning with projects that are real time and experience that they accumulate from these projects are valuable. We have a very strong database of civil technicians and engineers who would add immediate value to the operation of any construction organizations.

We have also introduced NTVQF Level 1 and Level 2. We invite outsourced assessors and trainers to test the acquired knowledge and skills by our students.

WELDING DEPARTMENT

Welding is one of the most essential skills for various levels of industrial establishments. Without welding, lot of high structural job cannot be completed with efficiency. There are different kinds of welding that are required for water pipe, oil pipe line, gas pipe line etc. As a result, the demand for welding in most countries is increasing rapidly, especially in the industrial based regions. GTCL has observed a tremendous number of requests for well qualified welders from Europe and North America. We have a customized plan under which workers get trained on this discipline by top level instructors who have real life experience working abroad. Our crafted curriculum is suitable for both beginners and experienced welders.

COMPUTER DEPARTMENT

The importance of the computer education is second to none in today's modern economy. We have a good number of well qualified working people in our country who have good degrees but are not computer literate. Due to this, we are lagging behind in the corporate world culture and it is costing us hugely in wages. The main objective of GTCL is to increase the awareness of ICT among the employees/workers who have not had much exposure to learn about computers due to the absence of a structured education system. GTCL has started this mission for all levels of employees/students to help their career development. We offer 4 courses here on computer.

SECURITY TRADE

Recently, GTCL has observed an increase in demand for quality security guards both abroad and in the country. We maintain a rigorous form of training for the security guards and officers. In our core programme model, we have three major sections: Industrial Security, Bank/Commercial Security and Residential Security. After completion of the core training programmes, we deploy our graduates to local internship of three months which gives them professional work experience before they might be interested to overseas employment. Our security guards have earned a deep appreciation from the client base and the quality of our guards are well recognized.

Our security training focuses on approach, etiquette, attitude, speaking English, reporting, maintaining register and daily routine works etc.

FOOD & BEVERAGE AND HOSPITALITY SECTION

A career in hospitality management offers opportunities all over the world. Our training prepares one for this by providing training on food and beverage management, accommodation management and food science. Employers can develop technical knowledge and skills within our excellent facilities, which include production kitchens and a training restaurant. The programme seeks to develop communication and team building skills. Courses deliver applied learning through extensive use of multimedia, graphics, simulation and demonstration etc. GTCL is exploring various options to be affiliated with brand hotels & resorts in Bangladesh to provide the graduates internship as a part of their course activities.

ELECTRICAL DEPARTMENT

Hands-on electrical maintenance training is our specialty. In addition to written test and oral test every student must successfully perform the required procedures on real equipment demonstration with all compliances in order to pass - not just watch someone else do it. Each of our instructors has decades of field experience so they can provide a real world perspective in the classroom and they have the ability to effectively communicate that knowledge. The courses included in this department are House Wiring, Installation and Maintenance, Motor Rewinding etc. Electrical department has BTEB registered assessors and trainers having overseas experience.

DRIVING & AUTO MECHANICS

GTCL has one of the finest programmes in the country for its Driving and Auto Mechanics Section. It offers various courses aiming to teach its students about Defensive Driving, Auto Mechanics, Driving for Beginners, Light vehicle driving, Industrial driving (Heavy Drivers) etc. We also have country specific courses that teach students about traffic rules and regulations in a particular country. We have a recent success of deploying a very good number of drivers in United Arab Emirates which received a very well appreciated response from our clients in UAE.

PLUMBING & PIPE FITTINGS

In the developed world, sanitary infrastructure is important for public health. Our plumbing and pipe fitting courses are enriched with modern technologies and tools. Trainees are imparted with training on drawing and symbols. GTCL has a well-equipped practical setup and a pool of qualified engineers to oversee our courses in plumbing & pipe fitting trade. Environmental protection, safety guidelines, and sector specific knowledge are also provided to them.

CLEANING & HOUSEKEEPING

A clean environment is important for our mental health and also for physical well-being. We at GTCL put special emphasis in cleaning & housekeeping courses which are equipped with most modern and sophisticated tools that are used for practical demonstration purpose. Our courses include soft skill training that would enhance the leadership quality of each individual. Our instructors have real life work experiences in major hotels & resorts abroad. We have dedicated class hours on each training day to teach them conversational English as we believe each of our graduates should be able to communicate with our overseas clients.

MECHANICAL TRADE

In any type of mechanical devices or heavy construction machineries we need to have regular maintenance and repair works. All major industries use mechanical devices and to maintain them we need skilled workers. Manufacturers of mechanical devices also need skilled engineers and operators. GTCL has a well-equipped practical setup and a pool of qualified engineers to oversee our courses in Mechanical Trade. The students in this section outnumbered almost all other trades due to its popularity.

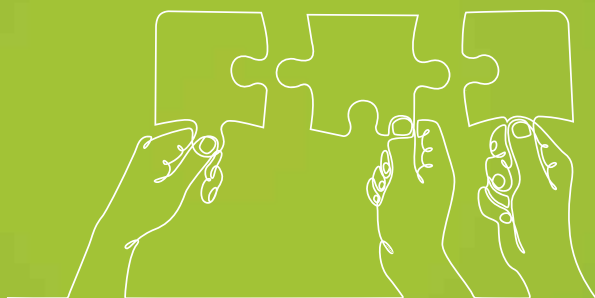

Local Manpower Supply

Demand for skilled manpower for the local industries has been experiencing a huge upsurge of late due to massive industrialization. The newly set up Economic Zones have added to this demand further. This booming industrial growth has made it an imperative that we make our workforce ready imparting appropriate skillset so that indigenous industries never fall short of the required skilled workers to ensure production quality. We are mindful of this reality and have been constantly striving to keep pace with the ever-increasing local need. Skill development training in Greenland Training Centre is geared to that direction and all our efforts are focused to fulfill local need for skilled manpower. We have a dedicated job placement cell that maintains communications with the local industries to know their exact requirements so that we can provide, if need be, customized solutions to their need for trained personnel. GTCL trained tradesmen are highly sought after in the local industries to fulfil their requirements of skilled manpower.

Our primary objective is to provide our clients pre and post customer services as needed for the well maintenance of our workers. We also provide refresher training on demand from the local industries. We tailor the training curriculum to fulfil the exact skillset of our clients. Our clients feel safe to come to agreements with us for our after-sale service and commitment, not to mention our experience of three plus decades. We take care of any issues related to the workers provided by us and we assist our clients throughout the contract period.

Our technicians and workers are sought after for their technical skills, hard work and the ability to work under any difficult conditions. Bringing together the organizations that need such workers for better production and the pool of good skilled workers has been successfully done by the services provided by GTCL. We do feel that there is ample scope for us to work for you to fulfill your needs in manpower. If necessary we can meet, discuss and finalize other terms and conditions to our mutual business interests.

We can assure you of complete satisfaction with our style of operation, confidentiality as well as with fruitful results. We plan to open such services to other part of GCC soon. List of Manpower Categories that we deal with are:

- Electrical Technician
- Mechanical Technician
- Industrial Electrician
- Welder
- Finishing Carpenter
- Shuttering Carpenter
- Steel Fixer
- Mason
- Tile Mason
- AC Technician
- Aluminum Fabricator
- Gypsum Installer
- Plasterer
- Mechanical Fitter
- Helper (Civil & Mech.)
- Cleaner (Outdoor & Indoor)
- Painter
- Plumber
- Pipe Fitter
- Fabricator
- Duct Mechanic
- Waiter & Waitres
- House Keeping Personnel

GREENLAND JAPANESE LANGUAGE CENTRE (GJLC)

Greenland Japanese language centre started in August 2019 to help young people from Bangladesh who are interested in seeking employment opportunities in Japan. In terms of teaching, our centre has a team of Japanese language instructors who are engaged in teaching Japanese language for a long time and have a rich teaching experience in Bangladesh.

Our Course

The Primary Level Course N5 Level (3 months)

Basic ability to lead daily life in Japan; basic expression of life terms, reading and writing of Hiragana and Katakana & Kanji.

The Intermediate Level Course N4 Level (3 months)

Understand the Japanese culture and etiquette; improve the ability of self-expression, reading and writing of Hiragana and Katakana & 500 kanji.

Duration of the course is 3 month which includes 180 hours of classwork.

- GJLC believes all students are unique & special. Our dedicated teachers take care of every student individually with utmost care.
- A quiet & serene environment in the suburbs of Dhaka. It is a very good environment friendly location to learn Japanese language.

Japanese language Technical Intern training programme (TITP) organized by Greenland Training Centre Ltd (GTCL).

Our Honorable Chairman Mohammad Abdul Hye presenting crest to H.E Mr. Ito Naoki, The Ambassador of Japan in Bangladesh.

Recognitions

Mr. Abul Maal Abdul Muhith, the then Honourable Finance Minister of the Government of the People's Republic of Bangladesh, hands over the award for the "Best Skill Development Institute" to Mr. Abdullah Al-Mamun, Managing Director, Greenland Training Centre Limited, at the First NRB Manpower Development & Opportunities Conference at Dhaka Sheraton Hotel.

Engr. Khandker Mosharraf Hossain, the then Honourable Minister, Ministry of Labour and Employment and Ministry of Expatriates' Welfare and Overseas Employment hands over the award for the "Best Recruiting Agency" to Mr. Mohammad Abdul Hye, Chairman, Greeland Group & Greenland Training Centre Limited at "Remittance Utshab & Shonar Manush Award" ceremony organized by RMMRU.
